WORK EXPERIENCE

Edifecs | Jul 2013 – Present, Lead Product Designer

A Design Leader, working with Edifecs on a mission to change the face of healthcare and wellbeing through innovative solution combining physical tools and digital applications across all platforms. Currently, I am leading the mobile design for a business vertical aimed at building communities around holistic wellbeing.

University of Washington | 2011 - 2013, GA UX Design

Worked with the Clinical Research team to design and also co-develop the front end of a clinical solution aimed at managing and monitoring data for cancer patients.

Digital Green | 2010 - 2011, UX Designer

Joined as the first designer with the non-profit organization to establish the brand, design award winning software solution and design the first organization website to promote and support marginalized communities to enhance agricultural practices using technology.

Microsoft Research Labs, India | 2009 - 2010, Design Intern

Worked with the Technology for Emerging Markets team to design games based learning applications to enable collaboration and learning among students in the resource constrained environments.
